

**NOTES:**

- 1) This diagram is provided to assist the homebrewer in locating signals on the HC908 MCU and the board edge connectors. Dimensions not shown to scale.
- 2) The printed circuit traces shown here are not actually as on the board but they do indicate proper signal routing.
- 3) Color coding of the connectors J1 (blue) and J2 (red) are consistent with the schematic representations in order to help homebrewers make connection to the proper signal on mating P1 and P2 pinheaders.

HC908 Daughtercard Pinouts
